- Created Responsive layouts (Mobile/Tablet/Desktop) using HTML, CSS
- Content upload into CMS and creating pages using a fixed template structure.

PROJECTS

PROJECT: CUSTOM COMPONENT LIBRARY

Project Description: Component library is a collection of components and modules built using React JS, Tailwind CSS, and Storybook UI. This library can be imported and used in multiple sites/applications maintaining consistent UI throughout all the client websites.

Roles and Responsibilities: UI/UX Developer

- Developed many components and modules with core functionality.
- Created stories for every component in storybook UI with React JS.
- Creating rich interactive components allowing many customizations through props on the component.
- Along with creating components from scratch, also installed and used few 3rd party components.
- Collaborating with the design and creative team and addressing any feedback changes.
- Version controlling the library and releasing new components/features in batches.
- Providing backward compatibility to components that are updated in the newer versions and ensuring the older applications don't break.
- Created page template stories in the storybook using the components for demo and trained the client's dev team.

Technologies: HTML5, CSS3, Tailwind CSS, JavaScript, React JS, and Storybook UI.

PROJECT: SCHOOLKNOT

Project Description: Schoolknot is an integrated school management web application with a host of features like Progress Reports, Homework, Attendance, timetable, Parent & Teacher Communication, School Bus tracking. Schoolknot gets all these features into one centralized, user-friendly and that can be accessed online by your school staff from any internet connection on Web or Mobile.

Roles and Responsibilities: UI/UX Developer

- Developed core front-end functionality with JavaScript.
- Dynamic routing functionality based on user permissions.
- Coordinating with the back-end developers in the process of building the RESTFUL API.
- Developed helper functions to make API requests and displayed the response JSON data in the UI.
- Storing user preferences in cookie for customized experience on every visit.
- Developed form functionality and custom validation to handle form submissions.
- Added functionality to display user understandable error messages for different http responses on API calls.

Technologies: HTML5, CSS3, Bootstrap, JavaScript and JQuery.

PROJECT: HOSPITAL MANAGEMENT SYSTEM

Project Description: Hospital Management System is a website to manage all operations (functionalities) inside the hospital premises. Like patients visits, Doctor Consultations, number of patients visited in a day , number of patients visited in a month, which department they have visited etc.

Roles and Responsibilities: UI Developer

- Converted photoshop design files to interactive web pages using HTML, CSS, and JavaScript.
- Handling updates and maintenance of the application.
- Integrated API code into the JSX templates (React)
- Supporting and bug fixing

Technologies: HTML5, CSS3 (SASS), React JS, JavaScript
